

MapleLMS

Description:

MapleLMS is a two-pronged Learning Management System for associations of all sizes seeking scalable tools to deliver e-learning and professional development to members and learners **plus** secure remote proctoring of exams or HR skills assessments.

The two segments can be purchased together or separately. MapleLMS and MapleExams are affordable for smaller budgets, and can easily scale to offer tests and proctoring tools for up to 100,000 candidates concurrently. Instructors and learners appreciate choosing to access using a desktop, laptop, tablet, or smartphone.

A unique benefit is the two-way connection where a member/learner enters your website, uses familiar SSO login, selects and purchases a course, and then **immediately** begins course study--no delay or separate login. MapleLMS offers out-of-the-box integration with Salesforce, Fonteva, NimbleAMS and others plus Zoom, Teams, and GoToMeeting to streamline staff time and effort while improving the member/learner/instructor experience.
